Passion

Cyber Security
My biggest factor for choosing Computer Science as my major was that it gave me the freedom to focus on any technological industries I wanted. I found a passion for cyber security during my time at Miami, and have continued on a self taught journey to learn more about, and eventually work in, the cyber security field.

Lilly

Women in IT Conference
Selective weekend long conference for women with IT related majors. In-depth learnings about the pharma industry along with career advice. This conference was a major eye-opener for me, as Eli Lilly was not a company that I knew very much about going in.
